

Notice of Availability of a Draft Environmental Impact Report (EIR), Public Workshop and LAX Specific Plan Compliance Review for the LAX United Airlines Aircraft Maintenance and Ground Support Equipment Project

This is a Notice of Availability for the Draft Environmental Impact Report (EIR), Notice of a Public Workshop and Notice of LAX Specific Plan Compliance Review for the LAX United Airlines (UAL) Aircraft Maintenance and Ground Support Equipment (GSE) Project at Los Angeles International Airport (LAX).

Project Description

This project proposes to consolidate and modernize existing UAL aircraft maintenance and GSE facilities at LAX. UAL proposes to redevelop their existing eastern facility to consolidate all of UAL’s aircraft and GSE maintenance activities. The proposed project would redevelop an approximately 35-acre site in the eastern portion of the airport operations area with a new facility totaling approximately 411,000 square feet. The project site is located in the eastern portion of LAX at 6000-6016 and 6020-6024 Avion Drive, east of Sepulveda Boulevard and south of Century Boulevard. Implementation of the proposed project would result in significant and unavoidable impacts to historical resources and construction-related air quality. Impacts to cumulative construction traffic would be less than significant with mitigation. All other impacts would be less than significant. A complete description of the proposed project and environmental documents are available online on the Los Angeles World Airports website at <https://www.lawa.org/en/lawa-our-lax>.
