1. Parking Structure 3: Smart Parking Project

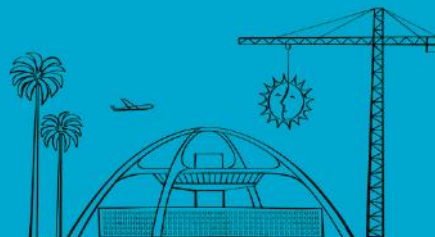

- Parking Structure 3 will experience a reduction in available parking stalls through December 2021 for the ABM Smart Parking Project
- Painting in the structure is scheduled to begin this week; Other improvements include installation of electric vehicle chargers, PGS systems and pay on foot stations, and more
- Signage is posted to assist with wayfinding; access to and from the structure and vertical circulation is maintained at all times
- Similar work in Parking Structure 4 is scheduled to begin early July 2021; watch Construction Hot Topics for updates

2. Terminal 4.5: Construction Updates

- The Terminal 4.5 Core Project continues to make progress with structural work on the future connector building between Terminals 4 and 5
- Upon completion, the Terminal 4.5 Core will connect with the Automated People Mover's West CTA Station and also provide vertical transportation for both Terminals 4 and 5
- An airside tower crane is in place to facilitate construction; On the roadways, innermost lanes are closed on both levels to be used as temporary pedestrian walkways to detour passengers around construction
- Traffic and passenger pick-up / drop-off is maintained at all times around these restrictions

3. Automated People Mover: East CTA Station

- Progress continues at the future APM East CTA Station with falsework removal and construction of canopy columns
- Pictured right, a view looking up from Center Way between Parking Structures 1 and 7 shows the elevated guideway after falsework has been removed, showcasing a better idea of what the APM will look like upon completion
- Pictured below, a recently erected tower crane at the East CTA Station site is in place to facilitate heavy construction; Columns are being built atop the guideway that will support the future station and canopy
